Intelligent brake light: A proposal

June 30, 2010

In today's dense traffic, traditional brake lights in many situations no longer serve the purpose to warn the trailing vehicle of a slow-down – because they are on anyway during a slope, or because the traffic is so dense that the following vehicle is too close anyway. The article at hand proposes an ...

TODAY'S NEWS

- Retrofit kit will turn diesel van into e-car
- Bosch Car Multimedia takes Linux inside
- Volkswagen tests C2X-based intersection assistant
- Renault opens powertrain test center
- Daimler selects SMSC Kler technology for infotainment system
- Driver assistant system supports drivers in roadworks sites
- NXP's Mifare Plus selected for Turkey's road tolling system
- Audi presents future active safety technologies
- Dassault takes over automotive design software vendor Geensoft
- EU-funded project for full electric vehicle

More news

NEW PRODUCTS

- Step-down DC/DC converter with 150°C maximum junction temperature
- TSMC qualifies one-time-programmable IP for automotive use
- Software tools provide close view to ECU timing and scheduling
- Switch with detent for automotive applications
- Dual self-protected MOSFETs offer complete protection and greater thermal efficiency
- IPeMotion now supports video data online and offline analysis
- Vector overhauls calibration data management software

INTERVIEW

**Focusing on automotive, Micronas gains momentum**  
Semiconductor manufacturer Micronas has left a difficult year behind: In 2009, the company was forced to shut down its core business of image signal processing chips for TV sets. EE Times Europe asked ...

## NEXT EVENTS

---

April 05, 2011 to April 06, 2011 Exhibitions

**Printed Electronics Europe - Dusseldorf**

November 30, 2010 to December 01, 2010 Exhibitions

**IP - SoC 2010 - Grenoble**

November 30, 2010 to December 03, 2010 Workshops

**PowerMEMS 2010 - Leuven**

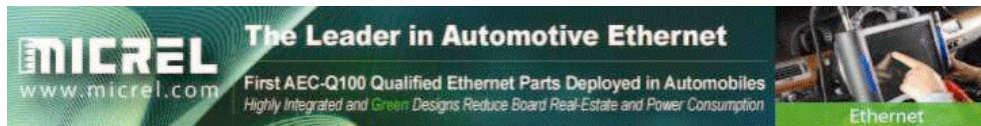

November 23, 2010 to November 25, 2010 Exhibitions

**SPS-Drives - Nuremberg**

November 09, 2010 to November 12, 2010 Exhibitions

**electronica - Munich**
